YETI and scienceOS form partnership

The partnership will contribute to a supportive environment for entrepreneurial students.

Dresden, Germany: Today, YETI announced a new partnership with scienceOS. This collaboration will offer members of the YETI program a preferred pricing scheme for the scienceOS AI research agent and support scienceOS with access to structured user feedback.

“Access to cutting-edge research tools like scienceOS gives us at YETI a real competitive edge,” says Wilhelm Wilker, participant of YETI Dresden. “As someone who will be working with the platform myself, I know how valuable it is for our projects. It enables us to explore ideas in biotech, healthtech, and beyond more efficiently and to build stronger, research-backed ventures.”

“Fostering entrepreneurial mindsets in young academics is essential to advancing science,” says Henri Max Deda, CEO and Co-Founder of scienceOS. “Through collaboration, we can empower the next generation to turn creative, evidence-backed ideas into impact.”

The benefits of this new partnership include:

- Preferred pricing scheme for participants of YETI
- Seminar for YETI participants on how to benefit from using scienceOS
- Access to user feedback for scienceOS

About YETI: YETI empowers students in Eastern Germany to become founders through innovation projects, mentoring, and entrepreneurial education.

About scienceOS: ScienceOS is the AI research tool to streamline workflows with access to over 220M trusted papers. It offers answers with citations, PDF uploads, and a library - all in one simple science AI chat.
